Regenerative Buildings and Products

The International Living Future Institute's mission is to cultivate a society that is socially just, culturally rich, and ecologically restorative. Our work is driven by a belief that a compelling vision for the future is needed to reconcile humanity's relationship with the natural world.

Over the past decade, the Institute has served as an incubator for more than 180 regenerative buildings that have achieved certification. Individually, these examples cause ripples that show what's possible. Collectively, they envision a regenerative future.

Our Work

The world's most holistic and ambitious rating system to create buildings that work in harmony with nature

A science-based certification for products that help restore our planet and improve the quality of human life

Independently verified performance for buildings powered by renewable energy to address climate change

Just.

Tools to promote corporate transparency and employee engagement while helping to create a better, more socially just and equitable world

Declare.

An easy-to-read 'nutrition label' for products with online resources to promote, share, and find healthier building materials

Work with developers to build affordable homes that are energy-efficient, free of toxic materials, and sustainable for future generations

Resources to take biophilic design practice from theory to reality, to promote the benefits of biophilic spaces

A simple framework outlining the 10 best practices a building must embody in order to be considered sustainable

Become a Member

Being a member has added credibility to my consulting work and improved business development. The authentic, meaningful relationships that I've built during events, especially at Living Future, are like no others I've made in professional settings.

- Nash Emrich, LFA, Buro Happold

Join a global network that is transforming the building industry to promote climate resilience, health, and equity. Become a member of the International Living Future Institute to stay up to date with innovations, engage with peers, or support the regenerative building movement.

Each year, the Institute hosts the Living Future conference, gathering the regenerative building community to share ideas, provide support, and connect with each other.
